

COVID-19 Protection for Abaris Students and Employees

At Abaris Training, the safety of our attendees and employees is critical to us, and we are taking a number of steps to provide the safest classroom and hands-on training environment possible. We are doing everything we can to ensure your safety and provide maximum flexibility as the situation around novel corona virus (COVID-19) continues to evolve.

Health and Hygiene – Updated as of May 19, 2021

- In the classrooms, we will only seat one student per table, instead of our normal two per table. Each table will have a clear plexiglass “sneeze guard” in front of and on each side of the student. Each table will have a box of Kleenex and a dispenser of hand sanitizer.
- There will be a box of sanitary wiping cloths available in each classroom, workshop area, and office area.
- Each student that has been fully vaccinated is not required to wear a mask in the classroom, however, we ask that those that are not yet vaccinated to please wear a mask when in the facility or in common areas where students gather. If you wish to bring your own mask, that would be preferable, but we will attempt to have enough additional new cloth masks to distribute if needed.
- Every bathroom will also, in addition to soap and water, have a bottle of hand sanitizer and a container of sanitary wiping cloths. There will be stocked paper towel dispensers and toilet seat cover dispensers in each bathroom.
- When the weather permits, we will keep outside classroom doors open for extra ventilation. We will encourage breaks to be taken outside, maintaining social distancing, and while we will provide snacks, they will only be available in single use sealed packets.
- These procedures will be updated and modified in accordance with State and Federal (CDC) guidelines as conditions change over time; as we all know this is an evolving situation, and we thank you all very much for your cooperation and understanding during these difficult times!

Michael J. Hoke
